

CropMind - Week 8 Frontend Completion

Verification Document & End-to-End Implementation Deliverable

Intern ID: TBI-26100746
Date: July 21, 2026

1. Authenticated Dashboard (User Scoped Data & JWT Session)

Logged-in view showing user-scoped registered crops registry, live IoT metrics (Soil moisture, rain probability, Mandi prices), and active Bearer JWT token header bar.

7. Network Tab Verification Screenshot

Chrome DevTools Network tab log proving successful 200 OK REST API calls between frontend React client and Express backend server with full request URLs and response sizes visible.

Chrome DevTools - Network Tab Verification

Live inspection of frontend HTTP requests to Express API backend (Status 200 OK)

Status	Method	Request URL	Type	Size
204 OK	OPTIONS	http://localhost:5000/api/auth/login	fetch/xhr	0
200 OK	POST	http://localhost:5000/api/auth/login	fetch/xhr	333
304 OK	GET	http://localhost:5000/api/telemetry	fetch/xhr	~1.2 KB
304 OK	GET	http://localhost:5000/api/crops	fetch/xhr	~1.2 KB
204 OK	OPTIONS	http://localhost:5000/api/crops	fetch/xhr	0
304 OK	GET	http://localhost:5000/api/crops	fetch/xhr	~1.2 KB
